## WASHING DRUMS

At UT Waste Management, we specialize in the thorough decontamination of contaminated drums and barrels through our meticulous washing processes. Our company proudly holds authorization from the Pollution Control Board (PCB) of Dadra and Nagar Haveli, ensuring compliance with stringent environmental standards. With a steadfast commitment to quality and safety, we employ advanced techniques to cleanse and restore these containers to pristine condition.

## Granules

Utilizing innovative processes, we transform discarded plastic materials into small, uniform granules suitable for a variety of applications. This approach not only helps in reducing plastic pollution but also provides valuable raw materials for manufacturing new products. UT Waste is committed to promoting sustainability and environmental stewardship through efficient plastic waste granule manufacturing.

Rexaw Chip Boards: Water-resistant panels crafted from recycled packaging waste, offering a sustainable alternative to wood and plastic-based materials like plywood and particle boards. Ideal for various construction applications including furniture, interiors, and partitions in homes, offices, and temporary structures. Additionally, they serve in exhibition materials, temporary shelters, and automotive components such as seat bases and backrests for three-wheeler vehicles. Available in thicknesses ranging from 4mm to 18mm.

to residential and industrial projects, we take pride in our ability to transform ideas into reality.
